A symbiotic steam generation system

simultaneous use of direct injection and boiler, maintenance of 100% humidity, possibly its regulation the only Slim type combi oven on the market with a boiler

Touch screen display

simple intuitive control with unique pictograms, all in Czech

the possibility of using preset programs or manual control

Weather system

patented device for measuring steam saturation in real time and in steam mode, the only one on the market

_ Steam tuner

a control element that enables setting the exact saturation of steam in the cooking chamber during the cooking process

Pass-through door

the door is also built into the back of the combi oven, while full control is retained from the side of the cook enables the distribution of the delivery area and the kitchen

Adaptation for roasting chickens

the chamber of the convection oven is designed to collect baked fat, the machine is equipped with a container for collecting fat

A kit of two machines on top of each other

connection kit allowing two machines to be placed on top of each other

connects the connections, inlets, wastes and ventilation of the lower combi oven

Premix burner

the only burner with a turbo pre -mixing gas with air on the market

the structure of the burner to V which prevents backfill and banging

This design saves 30 % of gas compared to conventional burners

Automatic washing

integrated chamber washing system possibility to use liquid and tablet detergents option to use vinegar as a rinse agent the system simultaneously descales the micro-boiler

Self -supporting shower

drum winch integrated in the body of the kettle the shower is inaccessible when the door is closed

Six-speed fan, reversible with automatic calculation of direction change

in cooperation with the symbiotic system, it ensures perfect steam distribution without losing its richness its operation is controlled by the program or manually

External temperature probe

temperature probe located outside the cooking area choice of single or multipoint probe or vacuum probe

Longitudinal insertion to GN
penetration placed on the "depth" of the machine exchangeable for 600x400 sheet metal inserts

downloading service reports software upgrade recipe playback
