Model	SAP Code	00038548
STMB 0611 G	A group of articles - web	Convection machines

1

Triple glass door as standard

better thermal insulation, less frequent reheating, safer operation due to lower outer glass temperature, less radiant heat, less heat leakage, lower load on electronics and mechanical parts

- reduction of heat losses, saving operating costs, reduced risk of injury to the operator when touching the glass, more pleasant working temperature in the kitchen, welcomed especially in the hot summer months, saving operating, service and acquisition costs thanks to the fact that the equipment suffers less from temperature fluctuations and wear

2

Clear 10" touch screen corresponding to other RM line devices

simple intuitive operation using images and visualizations, the same intuitive operation as on other digital devices in the RM line

- saving time when entering programs or cooking itself, saving time when training personnel, when operating the RM line equipment itself, saving costs and time

3

Smart cooking

Predefined basic programs for easy control with just a few touches

- saving human qualifications, time when creating programs

4

Symbiotic steam generation system

simultaneous use of "direct injection" and boiler, maintaining 100% humidity, or its regulation

- preparation of various dishes and cooking styles in an environment precisely set for a given food or dish

5

Self-winding shower

drum reel integrated in the combi oven body the shower is inaccessible after closing the door

- enables pouring food in the convection oven and rinsing the chamber - or speeds up the cooling of the chamber

6

Fan six-speed, reversible with automatic calculation of direction change

in cooperation with the symbiotic system, it ensures perfect distribution of steam without loss of its saturation, its operation is controlled by program or manually

- enables the preparation of various dishes from the most delicate to baking at high temperatures at the highest speeds

7

External temperature probe

temperature probe placed outside the cooking space option to choose from a single or multi-point probe or vacuum probe

- placing it outside the cooking chamber extends its service life
- ensuring complete hygienic safety of dishes
- HACCP recording
- control of heat treatment in the absence chef

8

Longitudinal drawers for GN

drawers placed at the "depth" of the machine option to replace with drawers for 600x400 trays

- possibility to insert the entire GN range, not just the 1/1 size, possibility to use 600x300 baking trays

9

USB

downloading service reports
upgrade software
playback recipes

- quick fault finding
- transfer of original recipes
- maintaining up-to-date software

10

Automatic washing

integrated chamber washing system
option to use liquid and tablet detergents
option to use vinegar as a rinse aid
the system also descales the micro-boiler

- the combi steamer chamber is washed without the presence of the operator, for example overnight
- the system descales the micro-boiler without the need for service intervention
- the chamber is maintained in constant 100% hygienic quality
